Hanh,

From the message attached to your e-mail, it looks like the EPA system deleted the attachment since it was an Excel spreadsheet. Here it the data copied directly to this e-mail. Hope it comes through this time.

I appreciate the opportunity to meet with you and Diane on the NPDES General Permit, and I agree that getting maximum input from all parties is the best way to fashion a robust document. Thanks for extending the invitation to us for the meeting.

Here's the information on the cooling water citations:
Non-Contact Cooling Water Temperature Increase
=1.40C (2.50F)

CITATIONS

2010 Camden Bay Exploration Plan
Appendix H (Environmental Impact Assessment)

Section	Paragraph	Line	Page No.
4.1.3 4	6	210	
4.1.9 5	5	230	
4.1.9 0	1	235	
4.1.9 4	1	242	
4.1.10	6	5	251
4.1.12	1	5	267
4.1.16	6	8	296

2010 Chukchi Sea Exploration Plan
Appendix F (Environmental Impact Assessment)

Section	Paragraph	Line	Page No.
4.1.2 1	2	248	
4.1.4 3	3	261	
4.1.5 2	2	272	
4.1.11	5	5	366

Regards,

Les

Hi Les,

Your spreadsheet did not come through. Did you send it as a zip file?
Please unzip and resend.

Thank you for a very productive meeting on Monday. I really appreciate you and others traveling to Seattle to meet with EPA. The discharge volume memo we promised is forthcoming.

Hanh Shaw

Subject: Citations in EPs for Temperature Increase of Non-contact
Cooling
Water

Dear Hanh,

Per our meeting on Monday, attached is an Excel worksheet with the places in both EPs where we refer to the non-contact cooling water temperature increase of 1.4 deg C (2.5 deg F) for the 45,000 bbls/day of this stream (assuming all engines aboard the drillship are operating at full load continuously). As you requested, I am working with the drilling contractor to come up with a better assessment of the actual cooling water flowrate expected during normal drilling operations instead of just quoting the maximum 45,000 bbls/day for each day of the drilling season. All citations are located in our Environmental Impact Analysis, an appendix to each EP. There are several such citations in each EIA.

Other requested information will be sent soon.

Please let me know if you have any questions.

Thanks and best regards,

Les
